ANNOUNCEMENT: Postdoctoral Research Fellow Position Available
Department of Chemistry
Trinity University

Applicants are sought for a full-time Postdoctoral Research Fellow position in the laboratory of Prof. Adam Urbach at Trinity University.

Trinity University is a private liberal arts and sciences institution located in San Antonio, Texas. Our chemistry department is nationally recognized for its excellence in undergraduate education through rigorous coursework and a high-quality undergraduate research program, which is one of the oldest in the nation. This postdoc position is well-suited for those pursuing a faculty position at a primarily undergraduate institution.

The Urbach research group specializes in the investigation and application of the molecular recognition of peptides and proteins with cucurbit[n]uril receptors. This position involves a specific focus in the area of protein drug formulation. The Urbach research laboratory is located in a state-of-the-art facility (https://www.trinity.edu/directory/spaces-places/center-sciences-and-innovation) and is funded by grants from the NIH and the Welch Foundation. This position is grant funded for up to three years.

Qualified candidates will have the ability and motivation to work independently and with undergraduate students, good communication skills, and demonstrated technical expertise in synthetic organic chemistry, supramolecular chemistry, protein chemistry, or biophysical chemistry.

The official job posting can be found at this link: https://www.trinity.edu/human-resources/employment-opportunities/staff/38761

Interested candidates should email a cover letter, CV, and list of references to Prof. Urbach at aurbach@trinity.edu. Applications will be considered on an ongoing basis until the position is filled.
